INDEPENDENT PROJECTS

- **Peafowl Movement, Home Range, and Interaction Analysis (ArcGIS Pro, Python, Jupyter, ArcGIS StoryMaps, 2025)**
  - Performed a professional geospatial analysis of GPS telemetry data for a Texas A&M professor's grant proposal project, generating movement paths, home range estimates (MCP, KDE), and spatial proximity metrics using ArcGIS Pro
  - Designed and implemented a spatiotemporal interaction workflow to identify bird encounters close in both space and time, including robust timestamp parsing and external Python-based preprocessing to overcome ArcGIS limitations
  - Authored comprehensive, client-facing documentation and step-by-step instructions enabling non-GIS users to reproduce, modify, and extend the analysis independently
- **Money Talks, But It Also Snores: Income & Sleep Deprivation (ArcGIS Pro, ArcGIS StoryMaps, ArcGIS Online, 2024)**
  - Developed an ArcGIS StoryMap analyzing the relationship between household median income and sleep deprivation across U.S. counties, using bivariate choropleth mapping, statistical analysis, and narrative visualization to communicate complex health and socioeconomic patterns
  - Conducted data sourcing and geospatial analysis using ArcGIS Pro while incorporating feedback from multiple sources
  - Delivered findings in a format accessible to both technical and non-technical audiences, demonstrating data storytelling and science communication skills
- **"The Waiting Game" (PyGame, 2024)**
  - Implemented facial recognition technology through OpenCV that is directly connected with unique game mechanics
  - Used Python and PyGame engine to create well-structured and useful open source code with git version control
  - Single-handedly packaged and delivered functional and machine-independent game file
  - Utilized Photoshop and Paint.NET to develop all assets by hand

WORK EXPERIENCE

Texas A&M University **September 2025 - Present**

GIS Student Technician *College Station, TX*

- Providing expert technical support and tutoring for GIS and Remote Sensing software (ArcGIS Pro, ArcGIS Online, QGIS, ENVI, Trimble), troubleshooting complex issues for students, faculty, and staff while explaining solutions clearly to users of varying technical skill levels.
- Developing and maintaining web-based GIS infrastructure by assisting with ArcGIS Online portal administration, managing geospatial data sets, and supporting web mapping applications, Story Maps, and field data collection tools.
- Developing software and configuring dynamic GIS web maps for AggieMap by managing layer visibility, popups, and data integration, supporting campus operations and special events through scalable, code-driven mapping solutions

Spur Tennis Club **August. 2024 – Present**

Owner, Event Organizer, Social Media Manager, Accountant, Customer Support *Gatesville, TX*

- Successfully hosting large-scale multiple monthly tennis tournaments with 50+ players of all skill levels and ages
- Managing all aspects of business, including 24/7 customer support, financial planning, accounting, event management, scheduling, merchandising, website maintenance, and networking
- Single-handedly managing social media campaign through creation of unique graphics and videos across Instagram, TikTok, and Facebook

Rafter E Productions **2021 - Present (As needed)**

Bookkeeper, Barrel Setter, Concession Stand Worker *Varying locations across Texas*

- Managed, edited, and automated workflows in Excel and live Google Sheets programs actively viewed by event staff and participants, ensuring accuracy of sensitive information under time-sensitive conditions
- Delivered real-time technical support for live data systems during high-pressure events, quickly diagnosing and resolving issues while being observed by clients and event attendees

EDUCATION

Texas A&M University **Graduation Year: December 2026**

Geographic Information Science and Technology, Minor in Computer Science *College Station, Texas*

- 3.74 Geographic Information Science and Technology GPA, 3.37 Cumulative GPA
- Relevant courses: GEOG 215 - Geospatial Cornerstone, GEOG 232 - Cartography and Visualization, GEOG 352 - GNSS in the Geosciences, GEOG 361 - Remote Sensing, GEOG 390 - Principles of GIS, GEOG 391 - Geodatabases, CSCE 221 - Data Structures and Algorithms, GEOG 461 - Digital Image Processing, CSCE 312 - Computer Organization, GEOG 312 - Geography Data Analysis

Gatesville High School **May 2023**

Gatesville, Texas

- Valedictorian, National Honor Society, 4.5 GPA
- 4+ years of Varsity Tennis, 3+ Years as Tennis Team Captain, 3rd Place in UIL 4A State Boys Singles

CERTIFICATIONS, SKILLS & INTERESTS

- **Certifications:** Udemy Certification of Completion: Automate the Boring Stuff with Python Programming, Classifying Objects Using Deep Learning in ArcGIS Pro, Displaying Raster Data in ArcGIS
- **Skills:** Programming, tech support, Photoshop, Excel, graphic design, video game design, project management, leadership
- **Interests:** Tennis, geography, programming, weightlifting, pickleball, game development, golf, history
- **Clubs:** TAMU Geographical Society, Texas Aggie Game Developers, Texas A&M Club Tennis
